Enthusiast obsessed with frontend and backend technologies. Professional dedicated to the development of websites with over 1 year of experience providing unforgettable moments to customers, maintaining the addiction to learning technologies that improve the day-to-day of users.

Working as a Full Stack JavaScript and PHP developer. With the irresistible desire to tinker, learn and create infrastructures involving JavaScript, HTML, CSS, Python, Vue.js, ReactJS, PHP, SQL, Jira, GitHub, Bootstrap, Laravel, CodeIgniter and mobile.

Professional Experience

CONTROLWARE SISTEMAS

September 2022

Junior Full Stack Developer

- Experience in the development and maintenance of pages in JavaScript and PHP.
- Knowledge of Jira and GitHub tools. Using Ajax, PostgreSQL and Bootstrap.

Experiences

API REST - PURCHASE ORDERS CODEIGNITER PHP AND MySQL

November 2022

- API developed using the PHP CodeIgniter and MySQL framework to be consumed by a front-end made with Bootstrap 5 and jQuery Ajax methods.
- The goal was to create an API with 3 CRUD endpoints. From products, customers and purchase orders that related products and customers. And the front-end to present the data in tables, perform data validations. Video on YouTube explaining how to run the application.

ENG&TECH - WEBSITE FOR SOLAR COMPANY

February 2020

- Website developed with the WordPress tool aiming to be a landing page.
- The purpose of the page was to show the brand online, bring security to the customer, show the company's portfolio and redirect customers to sales channels.

PHP MICROAPP THAT SENDS AND RECEIVES JSON FROM DB - HOME LAB:

August 2022

- I developed an API to fill in a JSON with the names of people and their children, display the JSON and pivot table made in HTM5 and using JavaScript with the possibility of removing them.
- Send and receive only JSON to object-oriented MySQL and PHP database.

API CRUD CAR PLATE AND API LOGIN REACTJS AND NODEJS- HOME LAB:

August 2022

- I developed an API to save model and license plate in a MySQL database.
- It was developed in Node.js and has a complete CRUD.
- Responsive registration and login system with encrypted password in ReactJS, Node.js and MySQL.
